Items Needed:		
Public domains for DMARC registration		
Inventory of mail servers		
3rd party vendors used to send mail on org's behalf		
Admin level access to public DNS for org		
If not, then access to person(s) with admin access to DNS		
A generic mailbox for receiving DMARC reports (i.e. dmarc@domain.com)		
Items to be aware of:		
DMARC policy levels		
None – No changes to incoming emails (recommended setting for initial setup)		
Quarantine – If domains don't match emails are sent your junk box		
Reject – If domains don't match nothing is getting to your inbox		
Sender Policy Framework (SPF)		
Domain Keys Identified Mail (DKIM)
